1       **I. INTRODUCTION**

2       Plaintiffs' Opposition fails to demonstrate how the First Amended Complaint ("FAC,"  
 3       Dkt. No. 97-3) cures the many defects found in Plaintiffs' original Complaint. The post-  
 4       Complaint "exemplary demonstrations" from Copilot (that Plaintiffs point to in an effort to allege  
 5       standing) all required Plaintiffs to input substantial portions of their own code, showing that it is  
 6       still not plausible that anyone other than Plaintiffs caused Copilot to output Plaintiffs' code prior  
 7       to the filing of the FAC. Plaintiffs therefore have shown that they cannot plausibly allege  
 8       standing for monetary damages. Plaintiffs also cannot avoid preemption of their state law claims  
 9       by recharacterizing their claims as "wrongful use" of their code as training data, when Plaintiffs  
 10       seek to vindicate their rights to prepare derivative works of their code. Plaintiffs' newly pled  
 11       examples of outputs also confirm the implausibility of Plaintiffs' DMCA claim. Plaintiffs do not  
 12       dispute that they must provide the majority of Plaintiffs' works as inputs in order to manufacture  
 13       non-identical outputs from Copilot. In addition, Plaintiffs' Opposition confirms that dismissal is  
 14       appropriate for Plaintiffs' state law claims for intentional and negligent interference with  
 15       prospective economic relations, unjust enrichment, unfair competition, and negligence. These  
 16       claims in the FAC should therefore be dismissed.

17       **II. ARGUMENT**

18           **A. Plaintiffs Cannot Allege Any Injury-in-Fact to Establish Article III Standing**

19            **1. Does 1, 2, and 5 cannot establish standing by showing their own post-  
 20            complaint acts harmed them.**

21       Plaintiffs' Opposition confirms that the specific examples alleged in the FAC, which form  
 22       their basis for standing for monetary damages, were generated *after* they initiated this lawsuit and  
 23       that there is no reason to think that *anyone other than Plaintiffs* prompted Copilot to output their  
 24       code. (*See* Opposition (Dkt. No. 141) ("Opp.") at 5-7, 9-10.) In doing so, Plaintiffs acknowledge  
 25       that the FAC does not contain *any* allegation that Copilot generated their code *in the past*.  
 26       Plaintiffs instead argue that the "detailed step-by-step explanation of how Plaintiffs' code is easily  
 27       produced in response to straightforward instructions from Copilot leads to a *reasonable inference*  
 28       that Plaintiffs' code already has been emitted." (*Id.* at 5 (emphasis added and omitted).)

1           In so arguing, Plaintiffs effectively concede that they manufactured injury to establish  
 2 evidence of past harm. But Plaintiffs “cannot ‘manufacture’ standing by inflicting a burden on  
 3 [themselves] out of a fear of [hypothetical future harm] that is nothing more than a remote  
 4 prospect.” *Stelmachers v. Verifone Sys., Inc.*, No. 5:14-cv-04912-EJD, 2017 WL 3968871, at \*4  
 5 (N.D. Cal. Sept. 7, 2017) (quoting *Clapper v. Amnesty Int'l USA*, 568 U.S. 398, 416 (2013)). Nor  
 6 do Plaintiffs respond to OpenAI’s argument that a plaintiff’s own acts cannot give rise to a  
 7 “concrete injury.” (See OpenAI Mot. to Dismiss (Dkt. No. 110) (“MTD”) at 7 (citing *Callahan v.*  
 8 *Ancestry.com Inc.*, No. 20-CV-08437-LB, 2021 WL 2433893, at \*5 (N.D. Cal. June 15, 2021)  
 9 (Plaintiff’s “five hours of investigation – researching [defendant’s] use of the records” and  
 10 “checking how easily he could find them with a web browser … does not create Article III  
 11 standing.”).)

12           Plaintiffs cannot evade the requirement to allege that someone harmed them prior to their  
 13 filing of the Complaint by arguing that their *ability to harm themselves* makes it plausible that  
 14 someone else also harmed them. Indeed, this Court previously held that Plaintiffs had identified  
 15 “at least a substantial risk” and a “realistic danger that Codex or Copilot will reproduce Plaintiffs’  
 16 licensed code as output” in the original Complaint. (Order Granting in Part and Denying in Part  
 17 Defs.’ Mots. to Dismiss (Dkt. No. 95) (“MTD Order”) at 9.) But that wasn’t enough to make  
 18 plausible that Codex or Copilot had *already* reproduced Plaintiffs’ code as output.

19           Plaintiffs’ new allegations only make their standing problem worse. Plaintiffs’ allegations  
 20 establish that one must intentionally submit substantial portions of Plaintiffs’ own code to prompt  
 21 Copilot to generate near-verbatim copies of that code. (See MTD at 4-5.) For this injury to  
 22 reoccur, Copilot users would need to already be in possession of Plaintiffs’ code to use it as a  
 23 prompt. Because Plaintiffs’ own “demonstrations” contradict their theory that Copilot would  
 24 *inevitably* reproduce their code, Plaintiffs’ allegations fail.

25           **2.       Does 3 and 4 also lack standing.**

26           Plaintiffs also concede that Does 3 and 4 lack standing by failing to identify any specific  
 27 instances in which their code was output by Copilot. They instead insist that any pleading  
 28 deficiencies can be cured “after the Parties have had adequate discovery.” (Opp. at 10.) But

1 standing must “exist at the time the complaint was filed.” *ACLU v. Heller*, 471 F.3d 1010, 1015  
 2 (9th Cir. 2006) (cleaned up); *see also Trump v. N.Y.*, 141 S. Ct. 530, 534-35 (2020) (“A  
 3 foundational principle of Article III is that an actual controversy must exist not only at the time  
 4 the complaint is filed, but through all stages of the litigation.”) (cleaned up). After Plaintiffs  
 5 failed to allege any specific facts regarding their code in the original Complaint, the Court gave  
 6 Plaintiffs another chance to investigate further and amend their pleadings. (*See* MTD Order.)  
 7 After a month of additional investigation, they have failed to provide *any* examples where Copilot  
 8 outputted code allegedly owned by Does 3 and 4. This failure suggests they have tried—and have  
 9 been unable—to prompt Copilot to generate Does 3 and 4’s code. They therefore cannot  
 10 establish standing.

11                   **3. Plaintiffs’ hunch that their code has been output does not justify  
 12 jurisdictional discovery.**

13                   In addition, Plaintiffs have not shown that they are entitled to any jurisdictional discovery  
 14 to cure their standing defects. (Opp. at 10.) While courts have discretion to grant or deny  
 15 discovery, discovery is inappropriate where the request for discovery is “based on little more than  
 16 a hunch that might yield jurisdictionally relevant facts,” or “when it is clear that further discovery  
 17 would not demonstrate facts sufficient to constitute a basis for jurisdiction.” *Gomez v. Elite Lab.  
 18 Servs. Weeklys, Ltd.*, No. 20-CV-01805-JST, 2021 WL 4992625, at \*6 (N.D. Cal. Mar. 16,  
 19 2021). “Absent some evidence establishing a colorable basis for jurisdiction,” a court must deny  
 20 a plaintiff’s request for jurisdictional discovery. *Sharma v. Volkswagen AG*, 524 F. Supp. 3d 891,  
 21 905 (N.D. Cal. 2021) (cleaned up). Plaintiffs cannot meet these minimal standards. The  
 22 Opposition does not provide any “colorable basis” or arguments beyond a mere “hunch” that such  
 23 discovery would establish standing for Does 3 and 4. Any request for jurisdictional discovery  
 24 must be denied.

25                   Because Plaintiffs have not plausibly pled an imminent and concrete injury necessary to  
 26 confer standing, all of their claims should be dismissed.

27                   **B. The Copyright Act Preempts Plaintiffs’ State Law Causes of Action**

28                   Plaintiffs affirmatively assert that their California law claims are “premised on the

1 unauthorized use of Plaintiffs' code for training purposes by Codex and Copilot without their  
 2 consent and removal of their CMI." (Opp. at 16; *see also id.* at 17 (stating that "it is that  
 3 wrongful use [of Plaintiffs' code as training data] that [] underlies Plaintiffs' California law  
 4 claims").) Plaintiffs argue that the right to use Plaintiffs' code for training AI products places  
 5 their claims beyond the reach of federal copyright law because Section 106 of the Copyright Act  
 6 doesn't cover "use." (*Id.* at 17.) This is an admission that training AI models does not, in and of  
 7 itself, infringe anyone's copyrights. OpenAI agrees, but Plaintiffs' claims are still preempted.

8 Where a state law claim arises from a right within the general subject matter of copyright,  
 9 it can still be subject to preemption, even if the precise contours of the right differ from those  
 10 conferred by Section 106 of the Copyright Act. *See Close v. Sotheby's, Inc.*, 894 F.3d 1061,  
 11 1070-71 (9th Cir. 2018) (holding that a California law that granted rights beyond the scope of a  
 12 copyright holder's distribution right nonetheless was equivalent to the distribution right for  
 13 preemption purposes); *see also Symantec Corp. v. McAfee Assocs.*, No. C-97-20367, 1998 WL  
 14 740798, \*4 (N.D. Cal. Jun. 9, 1998) (The "fact that the state-created right is ... broader ... than its  
 15 federal counterpart will not save it from pre-emption.") (cleaned up). Plaintiffs do not appear to  
 16 dispute that their claims fall within the subject matter of copyright.

17 The question, then, is whether Plaintiffs' claims are "equivalent to rights within the  
 18 general scope of copyright as specified by section 106 of the Copyright Act." *Close*, 894 F.3d. at  
 19 1069 (cleaned up). Notably, a plaintiff's claims need not be "coextensive" with or "precisely  
 20 within the contemplation of" the Copyright Act to be considered "equivalent" to the rights within  
 21 Section 106 of the Copyright Act, *id.* at 1071; rather, claims are preempted unless they are  
 22 "qualitatively different from the copyright rights," *Laws v. Sony Music Ent., Inc.*, 448 F.3d 1134,  
 23 1143 (9th Cir. 2006) (cleaned up).

24 In arguing that that standard is met here, Plaintiffs claim that their state-law claims are  
 25 about "use" of their code as training data, and that "use" is not one of the exclusive rights of  
 26 copyright. (Opp. at 16 (citing MTD Order at 10).) But Plaintiffs made essentially the same  
 27 argument with respect to their original Complaint. (*See* Dkt. No. 66 at 11 ("Plaintiffs allege that  
 28 Defendants, through their unauthorized use of Plaintiffs' code to train Codex and Copilot, and

1 their display of Plaintiffs' code to others for commercial gain, violated Plaintiffs' rights under  
 2 state and common law.”).) This Court rejected Plaintiffs' argument then, and it should do so  
 3 now. Plaintiffs' claims are fundamentally constructed on the premise that they own copyrighted  
 4 code, and that that code was misappropriated by OpenAI to create unauthorized reproductions  
 5 and an unauthorized derivative work. (See MTD at 8-9.) Those claims are “equivalent” to a  
 6 claim based on rights within Section 106 of the Copyright Act, and Plaintiffs cannot escape that  
 7 fact merely by attempting to label them as “use.” For example, in *Laws*, the plaintiff argued that  
 8 her claim was not preempted because it was based only on unauthorized “use” of her voice, but  
 9 the claim was nonetheless preempted, because the “the sole basis for her voice misappropriation  
 10 claim is the unauthorized reproduction of her copyrighted vocal performance,” whether or not  
 11 that reproduction infringed anyone’s copyright. *Laws*, 448 F.3d at 1143-44.

12 *Altera Corp. v. Clear Logic, Inc.*, 424 F.3d 1079 (9th Cir. 2005), the case cited by the  
 13 Court in its prior order (MTD Order at 17), does not compel a different conclusion. In *Altera*,  
 14 customers using the plaintiff’s software, which programmed semiconductor chips, agreed to the  
 15 terms of a licensing agreement that limited the use of software to “the sole purpose of  
 16 programming [chips] manufactured by … and sold by [the plaintiff].” 424 F.3d at 1082. In  
 17 finding that plaintiff’s breach-of-contract claim was not preempted, the court noted that the  
 18 underlying conduct challenged was a prohibited use of the software’s output bitstream files,  
 19 rather than reproduction of the software itself. *Id.* at 1089. Here, Plaintiffs have not challenged  
 20 OpenAI’s use of any end-product of their code. Rather, Plaintiffs’ claims rest on the supposed  
 21 unauthorized creation of a derivative work (in the form of the model) and reproduction of  
 22 Plaintiffs’ code (in the form of outputs from the model). Such claims are preempted. *See*  
 23 *DocMagic, Inc. v. Ellie Mae, Inc.*, 745 F. Supp. 2d 1119, 1148 (N.D. Cal. 2010) (concluding that,  
 24 because the “unauthorized use of a software’s end-product is, however, legally and factually  
 25 distinct from the unauthorized use of software itself,” defendant’s counterclaim related to the  
 26 unauthorized use of copyrighted software constitutes copyright infringement). Therefore, all of  
 27 Plaintiffs’ state law claims, except for their breach of contract claim, must be dismissed because  
 28 they are preempted.

1                   **C. Plaintiffs Fail to Plead a DMCA Claim Under Section 1202(b)**

2                   Plaintiffs spend much of the DMCA section of their Opposition (Opp. at 11-16)  
 3 addressing arguments that OpenAI did not make in its motion. (See MTD at 10-14.) Defendants  
 4 are not relitigating issues the Court has ruled on. Rather, Defendants' DMCA arguments are  
 5 limited to two issues pertaining to newly pled facts in the FAC: (1) Plaintiffs' specific examples  
 6 of "removal" are not removal of CMI from a work at all; and (2) the alleged "removals" from  
 7 these added examples are not from identical copies of Plaintiffs' works.<sup>1</sup> (*Id.*)

8                   **1. Plaintiffs have not pled removal of CMI.**

9                   Plaintiffs argue that their DMCA claim cannot be dismissed because they offer more  
 10 detail in the FAC than their original Complaint. (Opp. at 13.) But Plaintiffs' newly pled facts  
 11 confirm the implausibility of Plaintiffs' DMCA claim. Plaintiffs do not dispute that, in order to  
 12 get Copilot to output modified portions of Plaintiffs' source code, Plaintiffs first had to input very  
 13 specific and substantial portions of Plaintiffs' source code into Copilot. (MTD at 11-12  
 14 (discussing example of Copilot suggesting five lines of modified code only after Plaintiffs input  
 15 eight lines of verbatim code).) Plaintiffs offer no explanation for how Copilot's suggestion of a  
 16 modified snippet of Plaintiffs' code could constitute *OpenAI's* removal of CMI from Plaintiffs'  
 17 work, when *Plaintiffs themselves* provided the majority of the work to Copilot as the input  
 18 without any CMI. In other words, if there was any CMI on the code in Plaintiffs' examples in the  
 19 first place, Plaintiffs (not OpenAI) removed it, because in those examples Plaintiffs provided the  
 20 majority of the work to Copilot without any CMI. By Plaintiffs' logic, Plaintiffs could input into  
 21 Copilot 99 out of 100 lines of a work's code without CMI, and if Copilot suggests an output that

22  
 23                   

---

<sup>1</sup> Plaintiffs argue that Defendants should have moved for relief under Federal Rule of  
 24 Civil Procedure 60. (Opp. at 11 n. 7.) But Defendants are not asking the Court to correct its prior  
 25 order regarding the original Complaint. Defendants are moving to dismiss a new filing (*i.e.*,  
 26 Plaintiffs' FAC), and the proper mechanism to do so is through a motion to dismiss. And at any  
 27 rate, by its terms, Rule 60(b) is limited to "final" judgments, orders, or proceedings. See Fed. R.  
 28 Civ. P. 60(b); *City of Los Angeles v. Santa Monica Baykeeper*, 254 F.3d 882, 886-87 (9th Cir.  
 2001). "A district court's power to rescind, reconsider, or modify an interlocutory order is derived  
 from the common law," *Santa Monica Baykeeper*, 254 F.3d at 886, and a district court may  
 "reconsider its prior rulings so long as it retains jurisdiction over the case." *United States v. Smith*,  
 389 F.3d 944, 948 (9th Cir. 2004).

1 resembles the work's 100th line of code without including CMI, that output of a single line of  
 2 code would violate the DMCA, despite the fact that it was Plaintiffs who provided the first 99  
 3 lines of the work without CMI. Plaintiffs provide no authority to support their argument that  
 4 OpenAI must reproduce CMI in such circumstances when Plaintiffs are responsible for providing  
 5 significant portions of the work as input without CMI. Plaintiffs have thus failed to plead  
 6 removal of CMI.

7 **2. Plaintiffs fail to allege removal from identical copies.**

8 In response to OpenAI's authority from the Ninth Circuit that they must allege removal of  
 9 CMI from identical copies (MTD at 12-14), Plaintiffs cite only to out-of-circuit cases that do not  
 10 support their position. (See Opp. at 14-15.) *See Bounce Exch., Inc. v. Zeus Enter., Ltd.*,  
 11 No. 15cv3268 (DLC), 2015 WL 8579023 (S.D.N.Y. Dec. 9, 2015) (addressing whether terms  
 12 appearing in source code were CMI, not whether removal from non-identical copies falls under  
 13 § 1202); *ICONICS, Inc. v. Massaro*, 192 F. Supp. 3d 254 (D. Mass. 2016) (addressing whether  
 14 source code headers were CMI, not whether copy must be identical).

15 Plaintiffs next argue “[t]hat the emissions were not exact or identical is of no moment  
 16 when the allegations make clear the Defendants copied Plaintiffs' code in order to train Codex  
 17 and Copilot.” (Opp. at 15.) Plaintiffs appear to be arguing that the cases about identical copies  
 18 are really about whether an *inference* of copying can be made, and that they do not apply where  
 19 Plaintiffs have alleged copying of their original work in its original form such that an inference is  
 20 not required. (*Id.*) But these cases aren't about whether an inference is required—they are about  
 21 whether excerpting or modifying a work constitutes removal of CMI at all, and hold that it does  
 22 not. (MTD at 12-13.)

23 Finally, Plaintiffs selectively quote from the original summary judgment opinion in *Frost-*  
 24 *Tsuji Architects v. Highway Inn, Inc.* (Opp. at 15), leaving out the vital remainder of the quoted  
 25 sentence: “‘Virtually identical’ plans could have been created by redrawing Frost-Tsuji’s plans  
 26 and not including Frost-Tsuji’s copyright management information, **but that would not involve**  
 27 **removal or alteration of copyright management information from Frost-Tsuji’s original**  
 28 **work.**” No. 13-00496 SOM/BMK, 2014 WL 5798282, at \*5 (D. Haw. Nov. 7, 2014) (language

1 omitted from Opp. bolded). The *Frost-Tsuji* court did not “[make] plain” that copies could be  
 2 non-identical, as Plaintiffs contend. (Opp. at 15.) Rather, the court found the opposite—that  
 3 creating virtually identical plans without CMI *would not constitute removal* from an original  
 4 work. *See Frost-Tsuji*, 2014 WL 5798282 at \*5. Plaintiffs also misread *Dolls Kill, Inc. v.*  
 5 *Zoetop Bus. Co.*, No. 22-cv-01463, 2022 WL 16961477 (C.D. Cal. Aug. 25, 2022), as  
 6 demonstrating “the lack of identicity can only undermine the inference there was copying when  
 7 no such allegations are made.” (Opp. at 15.) *Dolls Kill* says no such thing, and in fact suggests  
 8 that the DMCA should not be implicated at all here, where Codex or Copilot is generating non-  
 9 identical copies. 2022 WL 16961477, at \*3 (“Re-creating another party’s work may be unlawful,  
 10 but it does not necessarily implicate the DMCA because copying a work does not require the  
 11 removal or alteration of CMI.”).

12 Because Plaintiffs have failed to plead removal of CMI and affirmatively allege non-  
 13 identical outputs, their § 1202 claim should be dismissed with prejudice.

14 **D. Plaintiffs’ Intentional and Negligent Interference with Prospective Economic  
 15 Relations Claims Fail**

16 The Opposition does not point to factual allegations to satisfy a single element of  
 17 Plaintiffs’ claims for intentional or negligent interference with prospective economic advantage.

18 **No Economic Relationship with the Probability of Future Economic Benefit.**

19 Plaintiffs contend that they have satisfied this element because (i) the FAC refers to “open-source  
 20 licensing relationships and communities,” (Opp. at 19), and (ii) courts have recognized that there  
 21 are “economic benefits[] to the creation and distribution of copyrighted works under public  
 22 licenses.” *Jacobsen v. Katzer*, 535 F.3d 1373, 1379 (Fed. Cir. 2008). While licenses may  
 23 sometimes confer benefits, Plaintiffs’ cited authority does not involve a tortious interference  
 24 claim and does not stand for the proposition that referring to open source licenses alone is  
 25 sufficient to satisfy this element at the pleading stage. As stated in OpenAI’s Motion, Plaintiffs  
 26 must plead specific economic relationships between Plaintiffs and third parties that have the  
 27 probability of future economic benefit, not merely the hope of future transactions. (*See* MTD at  
 28 15-16.) Plaintiffs have failed to do so and have not cited a single case that states otherwise.

1 **No Knowledge of an Economic Relationship with Third Parties.** Plaintiffs’ conclusory  
2 argument that Defendants were aware of “these relationships, including those of open-source  
3 communities” (Opp. at 19.) fails to show that they adequately alleged OpenAI’s knowledge of an  
4 economic relationship between Plaintiffs and a third party. Further, while Plaintiffs argue they  
5 need not name the third party (*id.* at 20), the *Ramona* court made clear that the third party must be  
6 “identified in some manner.” *Ramona Manor Convalescent Hosp. v. Care Enters.*, 177 Cal. App.  
7 3d 1120, 1133 (1986). As many courts have acknowledged, the allegations “must do more than  
8 conclusorily allege the existence of business relationships with which the defendant interfered.”  
9 *Logistick, Inc. v. AB Airbags, Inc.*, 543 F. Supp. 3d 881, 887 (S.D. Cal. 2021); *see also Damabeh*  
10 *v. 7-Eleven, Inc.*, No. 5:12-cv-1739-LHK, 2013 WL 1915867, at \*10 (N.D. Cal. May 8, 2013) (a  
11 plaintiff “must identify with particularity the relationships or opportunities with which defendant  
12 is alleged to have interfered”). Plaintiffs’ allegations do not identify with particularity the  
13 relationships with which OpenAI allegedly interfered.

14       **No Actual Disruption and Economic Harm.** Plaintiffs’ conclusory statements that the  
15       FAC “alleges actual disruption of Plaintiffs’ relationship with their users” and “does adequately  
16       allege economic harm due to interference with Plaintiffs’ open source code community” are  
17       insufficient to defeat OpenAI’s Motion. (Opp. at 20.) These blanket assertions, without any  
18       factual support, do not provide the requisite showing that OpenAI’s conduct actually disrupted  
19       Plaintiffs’ relationships with third parties or resulted in economic harm. *See Bell Atl. Corp. v.*  
20       *Twombly*, 550 U.S. 544, 555 n.3 (2007) (“Rule 8(a)(2) still requires a ‘showing,’ rather than a  
21       blanket assertion.”). For example, Plaintiffs do not allege in what way their future relationships  
22       with specific third parties were disrupted. Further, Plaintiffs’ statement that “[t]he fact that the  
23       open-source software was offered for free does not mean there was no consideration owed under  
24       the open-source license” does not demonstrate that Plaintiffs have suffered economic harm.  
25       (Opp. at 20.) As stated in OpenAI’s Motion, Plaintiffs have not identified any prospective  
26       contracts, job offers, or research assignments that Plaintiffs allegedly lost due to OpenAI’s  
27       purported interference, or the alleged monetary and reputational harm Plaintiffs experienced.  
28       (MTD at 18.)

1           **No Wrongful Conduct.** Plaintiffs have no response to their failure to plead “conduct that  
 2 was wrongful by some legal measure other than the act of interference itself.” (MTD at 18.)  
 3 Plaintiffs refer to OpenAI’s alleged failure to attach licenses when emitting code (see Opp. at 20),  
 4 but that conduct is not separate and distinct from the act of interference itself as alleged in the  
 5 FAC. (See FAC ¶ 262 (alleging that OpenAI’s operation of Codex and reproduction of code  
 6 without correct licenses “depriv[ed] Plaintiffs of the economic benefits of open-source  
 7 distribution”.) Plaintiffs’ argument fails on its face.

8           **No Intentional Acts.** Plaintiffs have failed to demonstrate that the FAC sufficiently  
 9 pleads “acts on the part of the defendant designed to disrupt the relationship” to satisfy the intent  
 10 element of an intentional interference claim. *Korea Supply Co. v. Lockheed Martin Corp.*, 29  
 11 Cal. 4th 1134, 1154 (2003). Rather, Plaintiffs conclude that OpenAI had the requisite intent  
 12 based on its alleged “failure to attach open-source licenses when emitting code.” (Opp. at 20.)  
 13 Those allegations, however, are insufficient because they do not allege facts that show that  
 14 OpenAI’s conduct was designed to disrupt Plaintiffs’ relationships with unknown third parties.  
 15 *See name.space, Inc. v. Internet Corp. for Assigned Names & Numbers*, No. CV 12-8676 PA  
 16 (PLAx), 2013 WL 2151478, at \*8 (C.D. Cal. Mar. 4, 2013) (dismissing claim where the  
 17 complaint did not identify “any intentional actions undertaken by [defendant] designed to induce  
 18 breach of Plaintiff’s contracts with its clients . . . .”) (cleaned up).

19           **No Duty of Care.** Plaintiffs have failed to mention, let alone identify, sufficient factual  
 20 allegations demonstrating that OpenAI owed Plaintiffs a purported duty of care, which is fatal to  
 21 Plaintiffs’ negligent interference claim. *See Stoltz v. Wong Commc’ns Ltd. P’ship*, 25 Cal. App.  
 22 4th 1811, 1825 (1994) (A negligent interference claim “arises only when the defendant owes the  
 23 plaintiff a duty of care.”).

24           **E. Plaintiffs Fail to State a Claim for Unjust Enrichment**

25           Plaintiffs’ unjust enrichment claim fails because they have not alleged the absence of any  
 26 applicable and enforceable contract provisions, even in the alternative, as required for a quasi-  
 27 contract claim. Plaintiffs do not deny that an unjust enrichment claim cannot proceed “when the  
 28 parties have a valid contract regarding the same subject matter.” (See MTD at 19.) Plaintiffs

1       allege that the open source licenses are a contract between them and OpenAI and that OpenAI  
 2       breached those licenses. (FAC ¶¶ 217, 222-25.) Although Plaintiffs now argue in their  
 3       Opposition that “the [open source] licenses do not specifically address the use of code as training  
 4       data or in connection with generative AI products sold to the public” (Opp. at 21), nowhere in the  
 5       FAC do Plaintiffs allege that the open source licenses are inapplicable. *See In re Bang Energy*  
 6       *Drink Mktg. Litig.*, No. 18-CV-05758-JST, 2020 WL 4458916, at \*10 (N.D. Cal. Feb. 6, 2020)  
 7       (dismissing unjust enrichment claim where “[p]laintiffs have not alternatively alleged the absence  
 8       of [applicable and enforceable] provisions”).

9       Moreover, Plaintiffs do not sufficiently allege that OpenAI unjustly retained a benefit at  
 10      their expense. (*See* MTD at 20.) “Restitution [under unjust enrichment] is not mandated merely  
 11      because one person has realized a gain at another’s expense,” but rather, “the obligation arises  
 12      when the enrichment obtained lacks any adequate legal basis and thus cannot conscientiously be  
 13      retained.” *Russell v. Walmart, Inc.*, No. 22-CV-02813-JST, 2023 WL 4341460, at \*2 (N.D. Cal.  
 14      July 5, 2023) (cleaned up). Restitution requires “that a defendant has been *unjustly* conferred a  
 15      benefit,” and “[a]bsent qualifying mistake, fraud, coercion, or request by [defendant], there is no  
 16      injustice.” *Id.* (cleaned up). Plaintiffs fail to point to any such qualifying conduct by OpenAI to  
 17      render retention of any benefit unjust. *See id.* (dismissing unjust enrichment claim based on  
 18      allegations that customers using Walmart’s self-checkout conferred a benefit on Walmart by  
 19      providing uncompensated labor because plaintiff failed to allege qualifying mistake, fraud,  
 20      coercion, or request by Walmart). This claim should be dismissed.

21       **F. Plaintiffs Fail to State an Unfair Competition Claim**

22       Plaintiffs have not stated a UCL claim under any prong.<sup>2</sup> Plaintiffs do not dispute that the  
 23      FAC failed to establish an inadequate remedy at law sufficient to state a UCL claim. (*See* MTD  
 24      at 21; Opp. at 23.) This alone warrants dismissal of their UCL claim. *See Sharma*, 524 F. Supp.  
 25      3d at 907 (concluding that, under *Sonner v. Premier Nutrition Corp.*, 971 F.3d 834, 844 (9th Cir.  
 26      

---

27       <sup>2</sup> Plaintiffs do not address OpenAI’s argument with respect to its unfair competition claim  
 28      under common law (see Opp. at 22-23), and accordingly, this common law claim should be  
 dismissed.

1 2020), plaintiffs “must establish that they lack an adequate remedy at law before securing  
 2 equitable restitution” under the UCL) (cleaned up); *Lou v. Am. Honda Motor Co., Inc.*, No. 16-  
 3 CV-04384-JST, 2022 WL 18539358, at \*2 (N.D. Cal. Aug. 26, 2022) (finding plaintiff  
 4 “concedes” argument when plaintiff “offers no response to [defendant’s] argument that he failed  
 5 to plead an inadequate remedy at law”).

6 Moreover, Plaintiffs’ argument that they were “denied their license, permission, and  
 7 recognition” does not establish economic injury sufficient for UCL standing. (Opp. at 23.)  
 8 Standing under the UCL is “substantially narrower than federal standing under article III” and has  
 9 “more stringent” requirements. *Kwikset Corp. v. Super. Ct.*, 51 Cal. 4th 310, 324 (2011).  
 10 Intangible losses are not enough. *In re Yahoo! Inc. Customer Data Sec. Breach Litig.*, No. 16-  
 11 MD-02752-LHK, 2017 WL 3727318, at \*22 (N.D. Cal. Aug. 30, 2017) (Plaintiffs’ “imminent  
 12 risk of future costs as a result of the [d]ata [b]reaches” fail to “show that [p]laintiffs have  
 13 specifically lost money or property as a result of [d]efendants’ misconduct.”) (cleaned up).  
 14 Labeling alleged intangible losses as “economic benefits” does not create standing; “generating  
 15 market share for programs, increasing national or international reputation..., and deriving value  
 16 from improvements to software based on suggestions by end-users” do not constitute “lost money  
 17 or property” under the UCL. (See FAC ¶¶ 281, 243.)

18 Plaintiffs’ cited cases do not show otherwise. *Jacobsen* and *Arifex Software* did not  
 19 involve UCL claims. *Jacobsen*, 535 F.3d at 1377 (copyright infringement); *Artifex Software, Inc.*  
 20 v. *Hancom, Inc.*, No. 16-CV-06982-JSC, 2017 WL 4005508, at \*2 (N.D. Cal. Sept. 12, 2017)  
 21 (breach of contract). Rather, *Jacobsen* and *Arifex Software* merely noted that the “lack of money  
 22 changing hands in open source licensing should not be presumed to mean there is no economic  
 23 consideration” in an open source agreement. *Jacobsen*, 535 F.3d at 1379; *Arifex*, 2017 WL  
 24 4005508, at \*4 (citing *Jacobsen*). Moreover, even if these purported “benefits” could qualify as  
 25 economic injuries, Plaintiffs have not alleged that OpenAI’s conduct caused decreased “market  
 26 share[s] for [Plaintiffs’ code],” decline in Plaintiffs’ “national or international reputation,” or any  
 27 loss in value of Plaintiffs’ code. (See FAC ¶¶ 243, 281.)

28 Plaintiffs’ UCL claim under the unlawful, unfair, and fraudulent prongs fails for

1 additional reasons. For the “unlawful” prong, Plaintiffs do not dispute that their derivative UCL  
 2 claim fails if the predicate DMCA and state law claims fail. (See MTD at 21; Opp. at 22-23.) For  
 3 the “unfair” prong, Plaintiffs’ conclusory assertion that OpenAI’s use of Plaintiffs’ code for  
 4 training is an “immoral, unethical, oppressive, or unscrupulous business practice[]” that  
 5 “outweighs the utility of the practice” (Opp. at 23.) is deficient. *See Doe v. CVS Pharmacy, Inc.*,  
 6 982 F.3d 1204, 1215 (9th Cir. 2020) (affirming dismissal of unfair claim where plaintiffs “assert  
 7 in a conclusory fashion that [defendant’s] conduct outweighs any justification, motive or reason  
 8 therefor, but they do not allege how that is so”) (cleaned up); *Nazemi v. Specialized Loan  
 9 Servicing, LLC*, No. 2:22-cv-05006-MCS-PVC, 2022 WL 17220707, at \*4 (C.D. Cal. Oct. 31,  
 10 2022) (“Plaintiff’s bare conclusory recitation of one of the UCL’s legal standards does not clarify  
 11 how Defendants’ conduct satisfies” the tests for the unfair prong.) (cleaned up). For the  
 12 “fraudulent” prong, Plaintiffs do not dispute that they must demonstrate actual reliance and  
 13 satisfy the heightened pleading requirements under Federal Rule of Civil Procedure 9(b) on the  
 14 purported deception to state a UCL claim. (See MTD at 22; Opp. at 23.) As Plaintiffs’ own cited  
 15 case shows, plaintiffs must plead “actual reliance on the alleged fraudulent conduct” and plead  
 16 “with specificity to meet Rule 9(b)’s strictures.” *Garcia v. Sony Comput. Ent. Am., LLC*, 859 F.  
 17 Supp. 2d 1056, 1063, 1066 (N.D. Cal. 2012). Plaintiffs have not done so here. *See Opperman v.  
 18 Path, Inc.*, 84 F. Supp. 3d 962, 974 (N.D. Cal. 2015) (claims sounding in fraud must contain “an  
 19 account of the time, place, and specific content of the false representations as well as the  
 20 identities of the parties to the misrepresentations”). Their UCL claim should be dismissed.

#### 21           **G. Plaintiffs Fail to State a Claim for Negligence**

22 Plaintiffs have not adequately pled that OpenAI owe them any duty of care, as they would  
 23 need to in order to state a claim for negligence. In their Opposition, Plaintiffs contend that  
 24 OpenAI’s duty arises from Plaintiffs’ open source licenses and their unspecified “special  
 25 relationship.” (Opp. at 24-25.) Neither is true under the circumstances here.

26 Plaintiffs’ argument that “a duty may arise out of a contract” (*id.* at 24) ignores  
 27 subsequent California case law that imposed an independent-duty requirement for tort claims  
 28 predicated on a breach of contract. Plaintiffs’ cited authority is inapplicable. Plaintiff cites 6

1 Witkin, Summary of Cal. Law (11th ed. 2017) Torts, § 1201, which relies on *Eads v. Marks*, 39  
 2 Cal. 2d 807, 811-12 (1952) (where the California Supreme Court recognized a tort cause of action  
 3 based on negligent failure to perform contractual duties), but recent decisions raise serious doubts  
 4 about the viability of *Eads*. See *Peregrine Pharms., Inc. v. Clinical Supplies Mgmt., Inc.*, No.  
 5 SACV 12-1608 JGB (ANx), 2015 WL 13309286, at \*8 n.11 (C.D. Cal. June 22, 2015) (observing  
 6 that “the continued relevance of *Eads* is somewhat questionable”); *Britz Fertilizers, Inc. v. Bayer*  
 7 *Corp.*, No. 1:07-cv-00846-OWW-SMS, 2008 WL 341628, at \*11 (E.D. Cal. Feb. 5, 2008)  
 8 (determining that “*Eads* has been refuted by later California case law that establishes the  
 9 independent duty requirement”). In *Britz*, the court highlighted three later-decided California  
 10 Supreme Court cases that held “conduct amounting to a breach of contract only becomes tortious  
 11 when it also violates a duty independent of the contract arising from principles of tort law.” See  
 12 2008 WL 13309286, at \*7-9 (citing *Aas v. Super. Ct.*, 24 Cal. 4th 627 (2000); *Elrich v. Menezes*,  
 13 21 Cal. 4th 543 (1999); and *Freeman & Mills, Inc. v. Belcher Oil Co.*, 11 Cal. 4th 85 (1995)).  
 14 Likewise, Plaintiffs cite *Buxbom v. Smith*, 23 Cal. 2d 535 (1944), but there the court did not hold  
 15 that a breach of contract could support a finding of duty. See *Buxbom* at 548. Because Plaintiffs  
 16 did not allege an independent duty distinct from any obligations under the open source licenses,  
 17 they fail to state a claim for negligence. (See Opp. at 24.)

18 Further, Plaintiffs have neither cited authority for finding a special relationship under  
 19 these circumstances, nor plausibly alleged that the balance of the six factors they cite in their brief  
 20 supports such a relationship. (See *id.* at 24-25 (citing *Vera Mona, LLC v. Dynasty Grp. USA*  
 21 *LLC*, No. EDCV 20-2615 JGB (KKx), 2021 WL 3623297, at \*4 (C.D. Cal. Apr. 15, 2021) (courts  
 22 look to six factors to determine whether a special relationship exists: “(1) the extent to which the  
 23 transaction was intended to affect the plaintiff, (2) the foreseeability of harm to the plaintiff, (3)  
 24 the degree of certainty that the plaintiff suffered injury, (4) the closeness of the connection  
 25 between the defendant’s conduct and the injury suffered, (5) the moral blame attached to the  
 26 defendant’s conduct and (6) the policy of preventing future harm”)).)

27 These factors do not support any “special relationship” based on OpenAI’s alleged use of  
 28 Plaintiffs’ code for training AI. The open source nature of Plaintiffs’ code makes it unlikely that

1 this use was intended to affect Plaintiffs, or that it was foreseeable and certain that Plaintiffs  
 2 would suffer injury. Indeed, the purpose of open source is to make code publicly accessible for  
 3 *anyone* to use and modify, as well as foster collaboration. Moreover, Plaintiffs have not cited any  
 4 authority finding that using publicly available data to train and develop generative AI products is  
 5 morally wrong or violates a public policy preventing such use. (See Opp. at 25.)

6 Plaintiffs primarily argue that “to the extent Copilot generates a duty because it hosts  
 7 Plaintiffs’ open source code,” that would also extend to OpenAI because Copilot is alleged to be a  
 8 joint venture between GitHub and OpenAI. (Opp. at 25.) But Plaintiffs cite no cases supporting  
 9 their argument that entering into a business relationship with a separate entity that hosts publicly  
 10 available code somehow creates a duty to Plaintiffs. The three cases that Plaintiffs do cite are  
 11 inapposite. In *Witriol v. LexisNexis Group*, the court ruled that plaintiffs adequately pled the duty  
 12 element of negligence by alleging that “[a]s custodians of the Representative Plaintiff’s and the  
 13 Class Members’ *personal and confidential* information,” defendants owed a duty to prevent  
 14 unauthorized access to private and sensitive data. No. 05-CV-02392 MJJ, 2006 WL 4725713, at  
 15 \*1, 8 (N.D. Cal. Feb. 10, 2006) (emphasis added). Similarly, *Bass v. Facebook, Inc.* held that  
 16 Facebook owed its *users* a duty of care because “some of the information [published on  
 17 Facebook] was private.” 394 F. Supp. 3d 1024, 1039 (N.D. Cal. 2019). Neither case supports  
 18 finding a duty where an entity merely “possess[es]” publicly available data of individuals with  
 19 whom they lack any relationship. (See Opp. at 25.) Likewise, in *In re Sony Gaming Networks &*  
 20 *Customer Data Security Breach Litigation*, the court found that defendant owed a “legal duty to  
 21 safeguard consumer’s *confidential* information *entrusted to a commercial entity.*” 996 F. Supp.  
 22 2d at 955, 966 (S.D. Cal. 2014) (emphasis added). That is not the case here. Because Plaintiffs’  
 23 code is available to the public, no similar duty exists. This claim should be dismissed.

24 **III. CONCLUSION**

25 For these reasons, OpenAI’s motion to dismiss the claims for violations of the DMCA,  
 26 intentional and negligent interference with prospective economic relations, unjust enrichment,  
 27 unfair competition, and negligence in the FAC should be granted.
